SUMMARY

Associate Product Manager candidate with experience in enterprise SaaS and D2C e-commerce, currently driving product initiatives at The Sleep Company and previously contributing as an AI Product Intern at Wipro TOPS. Led feature discovery and specification for ReX and crew operations workflows, alongside vendor evaluation, AI-driven workflow automation, Shopify catalog operations, PDP user flow design, and data quality initiatives. Brings expertise in product discovery, user research, PRD/spec writing, prioritization, roadmap planning, stakeholder management, automation, and data-informed execution.

WORK EXPERIENCE

The Sleep Company - Product Manager Intern, Growth

July 2026 - Present

- Led evaluation and finalization of **BSPs, CRMs, Payment Aggregators, OMS, and WMS** through market research, requirement gathering, and stakeholder discussions.
- Built AI-powered operational agents and a centralized knowledge repository to automate research, documentation, and internal workflows.
- Established data operations and quality control processes while standardizing the **Shopify Master Catalogue** for scalable product management.
- Mapped end-to-end **Product Display Page (PDP)** user flows to optimize customer experience and launch readiness.
- Implemented Shopify product automation workflows to streamline catalog management and reduce manual effort.

Wipro - AI Product Intern, Wipro TOPS

Feb 2026 - July 2026

- Scoped **Auriga ReX**, an internal AI-powered enterprise workflow platform, defining product flows from transcript ingestion and AI extraction to governed CSS/FSBCD/URS/FSD generation.
- Prioritized roadmap requirements across RTM traceability, codebase compliance mapping, AI effort estimation, role-based approvals, and audit controls for PM, SME, and engineering users.
- Defined and aligned **Crew Mobile Microapp** workflows across 12+ scheduling, assignment, and compliance scenarios; delivered specs that moved the feature into active sprint development.
- Owned **Non-Crew Records** end-to-end by defining acceptance criteria, validation rules, and edge cases; de-risked handoff by surfacing 3 data integrity issues before development.

Omniful.ai - Business Analyst Intern

Jun 2024 - Aug 2024

- Redesigned prospect qualification workflow and lead scoring using 8+ firmographic and behavioral signals; scaled qualified prospects from ~10/day to 200+/day, linked to **10 B2B acquisitions**.
- Structured 10,000+ prospect records into prioritized lead segments and weekly pipeline views, giving sales a clearer account view for higher-conversion outreach.

SELECTED PRODUCTS

Hackmate - Co-Founder Matchmaking Platform | Co-Builder | Live · 300+ users

Next.js · Redis · PostgreSQL · Vercel

GitHub

- Validated product discovery through founder interviews and community research; defined PRD, user flows, and matching logic for co-founder discovery.
- Grew to **300+ users organically**; diagnosed funnel drop-offs, prioritized feedback, and shipped user-requested improvements after launch.

Aarchid - AI Botanical Intelligence Platform | Product Lead | Live

Gemini 1.5 Pro · Exa AI API (RAG) · Next.js · Cloudflare Workers · Supabase

GitHub · Live

- Defined product vision, diagnosis UX, and AI evaluation framework; designed prompt chains achieving **92% diagnosis accuracy** across 200+ test images and 15 disease categories.
- Modeled unit economics (96% margin, breakeven at 50 users), user segmentation, and GTM strategy for a pay-per-audit and pro plan.

KiteEdge - Portfolio Analytics Platform for Zerodha Kite | Solo Builder | In Progress

Elixir/Phoenix · Python · React · Kafka · PostgreSQL

GitHub

- Framed the product around retail investor workflows, scoping 4 core modules covering risk analytics, forecasting, trade review, and portfolio diagnostics.
- Defined roadmap for a self-serve analytics experience with **43+ indicators**, exports, and dashboard workflows for investor decision-making.

ACHIEVEMENTS & LEADERSHIP

- 3rd Place, Techstars Startup Weekend (DTU)** - Led problem discovery, market sizing, GTM strategy, and pitch for a job matching platform.

SKILLS

Product: Product Discovery · User Research · PRD/Specs · Feature Scoping · Requirements Gathering · User Stories · Backlog Prioritization · Roadmap Planning · KPI Design · A/B Testing · Stakeholder Alignment · Go-to-Market
Analytics & Tools: SQL · Excel · Power BI · Mixpanel · Figma · Datadog

- **Top 5, Smart India Hackathon** | Led organization of 3 hackathons reaching 3,000+ students.

Methodology: Agile · Sprint Planning · Cross-Functional Delivery
Certification: Data Analytics with SQL, Excel and Case studies; AI Engineer
Agentic Track: The Complete Agent Course

EDUCATION

J.C. Bose University of Science and Technology, YMCA - B.Tech, Electronics & Computer Engineering | 2022-2026
