SUMMARY

Product management intern with experience in D2C commerce and enterprise AI. Own product definition, UX, initial development, and vendor delivery for Sensory Studio's Bed Visualiser at The Sleep Company. Previously built and improved an AI workflow application at Wipro supporting approximately 40–50 simultaneous users.

WORK EXPERIENCE

The Sleep Company

Jul 2026 – Present

Product Intern (Growth)

- Owned **Bed Visualiser** product definition, UX, and initial development, turning an idea into a working prototype for customers to explore bedding combinations in room settings; store launch planned for October 2026.
- Designed **3 entry journeys**—QR, promoter scanner, and kiosk—and defined recommendation rules implemented in the current build to guide coordinated product selection and complementary purchases.
- Manage outsourced development, cross-team dependencies, acceptance criteria, and functional testing; drive issue resolution ahead of store launch.
- Own product-data collection, organisation, corrections, and quality checks across a **721-SKU catalogue**.

Wipro

Feb 2026 – Jul 2026

AI Product Intern, Wipro TOPS

- Prototyped, built, and evaluated **Auriga ReX**, an AI requirements-document application; proposed output policies, batching, and chunking to improve completeness and support SMEs in producing final-cut documents.
- Identified reliability bottlenecks, selected approaches, and validated load-balancing and SQLite-to-PostgreSQL migration changes with engineers; ReX capacity increased from **10–15 to approximately 40–50 simultaneous users**.
- Built **Crew Mobile Microapp** and defined requirements across 12+ scheduling, assignment, and compliance scenarios.
- Defined **Non-Crew Records** acceptance criteria, validation rules, and edge cases; surfaced 3 data-integrity issues before development.

Omniful.ai

Jun 2024 – Aug 2024

Business Analyst Intern

- Redesigned prospect qualification workflow and lead scoring using 8+ firmographic and behavioral signals; scaled qualified prospects from ~10/day to 200+/day, linked to 10 B2B acquisitions.
- Structured 10,000+ prospect records into prioritized lead segments and weekly pipeline views, giving sales a clearer account view for higher-conversion outreach.

PROJECTS

Aarchid: AI Botanical Intelligence Platform

Co-Creator | Product & Engineering

Gemini · Exa AI · Next.js · Cloudflare Workers · Supabase

GitHub · Live

- Co-developed an AI plant-health product, owning product scope and the photo-to-diagnosis journey so plant owners could understand symptoms and decide what care to take.
- Defined citation-backed recommendations, severity-based guidance, and progressive disclosure to make AI-generated advice easier to inspect and use.
- Designed the evaluation framework and iterated prompts; measured **92% diagnosis accuracy** in a 200-sample developer-reviewed evaluation.
- Modelled **2 monetisation options**—pay-per-audit and subscription—with projected 96% margin and break-even at 50 users; defined user segments and go-to-market assumptions.

DeskTasks: Desktop & Mobile Task Management

Solo Builder | Team Adoption

Electron · JavaScript · PWA · Supabase

- Built DeskTasks from scratch, owning product scope and implementation across **2 interfaces**—desktop and mobile; adopted by approximately **8–9 teammates**.
- Designed the capture-to-completion experience around quick add, priorities, recurring tasks, reminders, and task history; made task capture accessible through a global shortcut.
- Added cross-device sync used by all participating teammates; defined local-first storage, offline behaviour, and conflict handling across desktop and mobile.
- Enabled data portability through **3 import/export formats**—CSV, Markdown, and calendar files—supporting spreadsheet, documentation, and calendar workflows.

ACHIEVEMENTS & LEADERSHIP

- 3rd Place, Techstars Startup Weekend (DTU)**: Led problem discovery, market sizing, GTM strategy, and pitch for a job matching platform.
- Top 5, Smart India Hackathon** | Led organization of 3 hackathons reaching 3,000+ students.

EDUCATION ---

B.Tech, Electronics & Computer Engineering
J.C. Bose University of Science and Technology, YMCA

2022 – 2026

SKILLS ---

Product: Product Discovery, User Research, PRD/Specs, Feature Scoping, Requirements Gathering, User Stories, Backlog Prioritization, Roadmap Planning, KPI Design, Stakeholder Alignment, Go-to-Market

Analytics & Tools: SQL, Excel, Power BI, Figma, Datadog

Methodology: Agile, Sprint Planning, Cross-Functional Delivery

Certifications: Data Analytics with SQL, Excel and Case studies; AI Engineer Agentic Track: The Complete Agent Course
